Participant 1 ([P1])

CSE 2nd Year, Private University A

- Q1 (Study Routine): "Brother, it's actually really hard to study strictly following a
- routine. But since I'm a CSE student, there is academic pressure, so at the end of the
- day, I have to sit with my books for at least 2-3 hours."
- Q2 (Sleep Duration): "My sleep schedule is all over the place. I stay up very late at
- night and wake up late in the morning. Overall, I don't sleep for more than 5-6 hours."
- Q3 (Social Media): "I spend a lot of time on social media! Whenever I'm a little free
- during the day, I grab my phone. Between watching YouTube Reels and scrolling
- through Facebook, I lose more than 6 hours a day."
- Q4 (Part-time Job): "Yes, I do private tutoring to cover my own expenses."
- Q5 (Stress Level): "My mental stress is quite high right now. Honestly, because I
- can't finish my daily tasks on time, the academic pressure feels even heavier."
- Q6 (Mental State): "I'm depressed quite often. I have constant anxiety about my
- career—what I'll do in the future, where my life is heading; thinking about these

- things makes me restless."
 - Q7 (Exercise): "No, I don't really exercise at all."
 - Q8 (Burnout Level): "I am at peak burnout right now. Trying to manage everything
 - leaves me feeling extremely exhausted."
 - Q9 (Attendance): "I try to be fairly regular at the university, my attendance is around
 - 70-80%."
 - Q10 (Sleep Quality): "My sleep quality is very poor. I can't sleep peacefully, and I
 - don't feel fresh at all when I wake up in the morning."
-

Participant 2 ([P2])

Masters CSE (1st Year), Private University B

- Q1 (Study Routine): "Since starting my Master's, I get a bit less time to study than
- before. After finishing my office work, I try to study for at least 3-4 hours every day,

- Q2 (Sleep Duration): "I'm a bit conscious about my sleep. Since I have a high-
- pressure job, I try to sleep for 6-7 hours to keep my body fit."
- Q3 (Social Media): "Normally, I use social media for about 2-3 hours. But part of my
- job involves student monitoring, so if I have to use Facebook for that, I sometimes
- stay online for over 6 hours."
- Q4 (Part-time Job): "I work full-time remotely for Programming Hero. Solving the
- kids' code all day long leaves me exhausted!"
- Q5 (Stress Level): "There is stress, but I can handle it. Since my job and studies are
- in the same sector (CSE), my job activities actually help me academically."

- laziness takes over. On the days I have university, there's a bit of physical movement,

- Q8 (Burnout Level): "Medium. Balancing the office and my Master's makes me feel
- tired sometimes, but I manage it somehow."

- because I enjoy programming. And since my job is remote, I change my shifts or take
